

# Boer Backhoe & Coastline Equipment

(Above) Boer Backhoe's John Deere 410J working at the LA County Museum of Natural History.

(Right) Justin Boer, Operator, Boer Backhoe.

*Mike and Sherry Boer have been in the backhoe rental business for over 30 years. Their company Boer Backhoe Inc. has provided operated equipment rental to the Southern California construction industry since 1990. They specialize in foundation work for large commercial jobs, as well as large and small underground utility projects. Boer Backhoe works primarily in Southern California with a focus on Los Angeles and Orange counties. They recently added a John Deere 410J backhoe to their fleet, which they purchased from Coastline Equipment.*

*Mike Boer comments, "Deere has gotten serious about their construction line. All of my construction equipment is John Deere and they are engineered well. I currently own four John Deere backhoes and my operators and I don't want to run any other machine. We've tried most of the other brands and we find the Deere backhoes easy to work on and maintain, in addition to being very fast and extremely powerful."*

*Mike adds, "Coastline has treated me great. Mike Smith, Long Beach Sales Manager is my hero. We've worked together for years. Mike is knowledgeable, fair, smart and a straight shooter. Lisa Ramey their sales representative has also taken great care of us. The whole team at Coastline is top-notch. Coastline's service department has bailed me out several times in a pinch. This kind of support guarantees repeat customers and that's what Boer Backhoe has become."*
