

THE MARK COMPANY & COASTLINE EQUIPMENT

(Left & Above) The Mark Company recently purchased a new John Deere 210LJ skip loader from Coastline Equipment. Shown here grading and excavating.

(Below L-R) Garrett Pack, Chairman, The Mark Company, Jeff Hendershott, Sales Representative, Coastline Equipment and Brett Pack, President, The Mark Company.

The Mark Company is a general engineering company based out of Orange, California. Since 1989 The Mark Company has been owned and operated by the Pack family. Under their leadership the company has grown and now specializes in numerous aspects of general engineering contracting. They provide services throughout California focusing on grading, concrete, asphalt and pipeline projects. Recently they took delivery of their third John Deere skip loader purchased from Coastline Equipment.

Brett Pack, President, The Mark Company comments, "We continue to purchase John Deere skip loaders due to our operator's preference. They have tried all the available machines and feel that they are able to maximize production and grade control on the Deere. As owners we enjoy the initial purchase price, machine up time and low maintenance costs versus other skip loaders we have owned."

Brett adds, "Coastline Equipment and Jeff Hendershott, our Coastline Representative are always quick to answer any of our concerns or questions. Coastline even arranged for the JD 210LJ design team out of Louisiana to pay us a visit. We had a design modification request and they came out and took care of it right away. We provide our clients with quality service and expect the same from our vendors. With Coastline Equipment we have found a company that shares the same vision and high standards that we do."
