(Below) Dave Sorem with Andrew Brown, Coastline Equipment's Compact Equipment Specialist.

Mike Bubalo Construction Co., Inc. was established in 1999 and works primarily as a large underground utility contractor in Ventura, Los Angeles, Orange, San Bernardino and Riverside counties. A large portion of their work is dedicated to the installation and maintenance of sewer systems, storm drains and water lines.

Dave Sorem, P.E. is the Vice President of Mike Bubalo Construction and recently purchased a brand new John Deere CT322 Tracked Loader from Coastline Equipment. Mike Bubalo Construction owns and maintains a large fleet of heavy construction equipment, of which the John Deere CT322 is the newest edition and their very first tracked machine. Lisa Ramey, sales representative for Coastline Equipment has been calling on Dave Sorem of Mike Bubalo Construction for around three years now and when the time came for a new machine, Dave decided to give her and Coastline Equipment a shot.

The deal started out as a lease/purchase, so that they could try the unit out and see if it could deliver. Dave Sorem, P.E. explains, "We had a project inside of a sewer plant that required us to remove the remains of an anaerobic digester. We needed the Deere track skid loader to push up the debris so that it could be extracted by a large excavator. The machine performed perfectly and our entire crew was very impressed. We then moved the John Deere to a storm drain clean out project, where it basically paid for itself, so we decided to purchase it outright. We have done a lot of clean outs with other skid steers and the Deere with tracks offered far better performance and traction for those hillsides and slopes. I am very satisfied with our new CT322 tracked skid steer, as well as the attention we have received from Lisa Ramey and their compact specialist, Andrew Brown."

Some of John Deere CT322 Track Loader Benefits

- Two-speed transmission,
- Hydraulic Quik-Tatch™,
- Self-leveling bucket
- High-flow hydraulics
- Comfortable HVAC system
- Comprehensive instrumentation panel
- Servo controls and an ergonomically shaped armrest
- Massive breakout force
- Deere's patented true vertical lift boom
- Large diameter idlers & steel reinforced rubber track
- 360-degree visibility
- Best-in-class breakout forces
- Industry-leading bucket capacities
- Easy Clean undercarriage simplifies day-end cleanup
- Unmatched 360-degree access to all components
- All-steel drive sprockets, idlers and rollers designed from Deere's larger crawler dozers
