Founded in 1985, Paramount Ready Mix is a privately held ready mixed concrete company serving the greater Los Angeles and north Orange County areas. Paramount Ready Mix provides ready mix concrete to local contractors for commercial, industrial and residential projects.

Paramount recently took delivery of a brand new John Deere 624J wheel loader purchased from Coastline Equipment Co. Ron Bousema, Manager, Paramount Ready Mix comments: "When it came time to buy a new loader we really shopped around. We demonstrated at least four brands and the John Deere 624J stood out above the rest. The ease of operation and user-friendly controls really sold us on this particular unit. Since the unit performs a variety of work at our concrete batch facility, the cab's visibility was very important to us and we found that the 624J simply outperformed the competitive machines. We are very happy with our purchase and can already attest to the 624J's tremendous performance, reliability and maneuverability." Ron adds, "The Coastline team was also a key factor in our decision to purchase our new John Deere wheel loader. Their salesperson Lisa Ramey really did a great job for us. She was very thorough and extremely professional. We purchased the service agreement along with the machine and Coastline introduced us to all of the service personnel that we will be working with in the future. The Coastline team's follow-up and training was exceptional. We look forward to a long relationship with Coastline Equipment Co.
